

► Marl M-5T

Marl M-5T

This versatile rig is equipped with independent hydrostatic drive and rubber coated steel tracks, allowing access to difficult sites such as under service station canopies and tight congested warehouse conditions. This rig maneuvers well on soft, hilly terrain.

Height: Without Crown 10' 6" (3.21m)
With Crown 12' 2" (3.71m)
Mast Down 7' 6" (2.26m)

Length: 12' 0" (3.6m) to end of mast when down

Width: 5' 0" (1.5m)

Weight: 12,100 lb - ground pressure of 6 psi
- ground pressure of 4 psi at 6" penetration

Torque: 6,000 ft lb

Equipped: 72" stroke

4 hydraulic stabilizers

Isuzu diesel engine

4000 lb capacity winch

Rubber coated tracks

Designed For: Augering (solid stem & hollow stem)

Dynamic probing and sampling

DCPT with automatic 140 lb trip hammer

"ODEX" casing systems
